Foreword

你好! Nǐ hǎo!

Welcome to the Meihua Chinese Learning series for primary schools, a series that was developed with the needs of primary school students, teachers and parents in mind. Our goal is to present a Chinese language-learning programme that is easy to comprehend and fun to learn.

In both written and spoken forms, Chinese is significantly different from other languages around the world. As a result, there are certain challenges in introducing and guiding students to master Chinese. To meet such challenges, this series focuses on delivering the lessons in phases; starting with vocabulary that reflects the student's daily routine needs, and the basic elements of the Chinese phonological system. Students will gradually progress into more complex and challenging language. Such delivery is reflected in the selection of phonics, pinyin, tones, characters, vocabulary and topics in each unit of the series.

Meihua Chinese Learning Series emphasises the development of a solid language foundation, with systematic and interesting features in each of its units throughout six levels. Each level consists of ten units designed to be completed by a student within a school year with 2-3 hours of lessons per week (70-105 minutes per week). Once a student has completed Level 6 of the series, they will have studied over 500 Chinese words, and acquired the skills to write more than 100 Chinese characters independently. They will also be able to comprehend simple reading texts without pinyin and communicate in simple daily Chinese conversation.

The learning in Meihua Chinese Series is dedicated to preparing students for the standardised International Chinese test, i.e. Youth Chinese Test (YCT), a Chinese proficiency examination for students in lower and upper primary established by Hanban (a public institution affiliated with the Chinese Ministry of Education). By completing all six levels of this learning series, students are expected to possess the skills needed to pass Level III out of four YCT test levels.

1. Student's Book and Audio CD

Each unit is divided into eight sections:

a. Text or dialogue

This section is composed of a combination of pictures, texts and/or interesting and easy-to-comprehend dialogues.

b. Vocabulary

Vocabulary is a crucial part in comprehending the Chinese language. The new vocabulary in this section is introduced through text and/ or dialogues.

c. Activities

The activities are designed to put the main lesson points into practice. The learning process is conducted in a fun and engaging way by encouraging student involvement and interaction with others.

d. Pinyin (book 1 & book 2), notes and grammar (books 3-6)

This section puts more emphasis on the phonemes that are foreign to students. Pinyin and tones can be learned in Level 1 and 2. The series focuses on the consonants and vowels that are different from those in other languages, as well as unfamiliar tonal aspects of Chinese.

e. Listening activity

The recordings on the audio CD have been developed to help familiarise students with the sounds, accents and structures of spoken Chinese.

f. Radical (books 1-4)

Radicals are the foundation of Chinese writing; they represent the semantic part of Chinese characters. With more than 90% of commonly used Chinese characters containing a combination of semantic and phonetic components, it is crucial that students have a solid understanding of radicals. Each unit introduces one or two radicals, which have been selected for their frequency of use and utility.

g. Chinese character writing

The introduction of the stroke-by-stroke guide to writing Chinese characters will teach students to understand the stroke orders of both basic and complex characters. The methods in this series will enable learners to apply their acquired skills in writing thousands of Chinese characters freely and independently.

h. Reading

In this learning series, not only are students encouraged to understand individual Chinese characters but also to recognise their meaning within a reading text. This provides context and a deeper understanding of character usage.

The student's book comes with an audio CD, which contains recordings of parts of text or dialogue, new vocabulary, pinyin and listening practice.

2. Workbook

The Meihua Workbook is designed to develop reading and writing skills. The workbook can be used as an integral workbook during class or as extra practice for homework.

3. Teacher's Guide

The Teacher's Guide is a practical manual with applicable teaching ideas, as well as important additional information to consider when planning lessons.
