2 Listen and read.

There are five oceans in the world. Their names are: the Pacific, Atlantic, Indian, Arctic, and Southern oceans. They cover 71% of the Earth's surface.

Scientists are studying the oceans and finding new species of animals. Some animals live deep below the surface. It's very dark, but they make their own light. Look at the anemone.

There are lots of plants in the oceans too. Small plants called phytoplankton produce 70% of the world's oxygen.

There are six continents in the world. Their names are: Africa, Asia, Europe, America, Australia, and Antarctica. About 60% of the world's population lives in Asia.

Antarctica is very cold, and there aren't any cities or towns there. Some people work there on scientific bases. The scientists study animals, rocks, and the weather.

The equator is an imaginary line around the center of the Earth. It goes through fourteen countries. The weather is usually hot, and there aren't any seasons at the equator.

After you read

3 Copy and correct the mistakes.

- 1 The continents cover 71% of the Earth's surface.
- 2 Some plants live deep below the ocean surface.

My Singapore blog

Hi! I'm Lee from Singapore.

- 📍 Singapore is a small country in Asia. Fewer than six million people live here.
- 📍 Our flag is red and white with five stars and a moon.
- 📍 Singapore is near the equator. There aren't any seasons. Our weather is hot and rainy.
- 📍 English, Mandarin Chinese, Malay, and Tamil are the official languages. I speak English and Mandarin Chinese, and I can also understand Tamil.
- 📍 People love going to restaurants. You can go to Chinatown for rice and noodles, or Little India for curry and delicious Indian cakes.
- 📍 October 1st is Children's Day. Schools are closed and children have a vacation day. We have parties, and parents give presents to their children.

My favorite place in Singapore is the Supertree Grove. I go there with my parents and my sister on Sunday. The

Supertrees aren't real trees. They are actually made of metal and concrete, but there are flowers and plants on them. There are eighteen Supertrees, and they're twenty-five to fifty meters tall. Solar panels on the Supertrees make electricity from the sun.

There's a coffee shop at the Supertree Grove. I have ice cream, my sister has pizza, and my parents have sandwiches. At night, there are lights on the Supertrees. I think they're beautiful.

Hi Lee. I like your blog! In my country, there are two official languages: English and French.
